NAVIGATING THE REGULATORY LANDSCAPE

The consumer has spoken. The THC infused beverage category has seen explosive growth since Minnesota became the first State to allow the commercial sale of hemp derived products. Proving that there is huge demand for functional alternatives to alcohol and Cannabev in particular. We at DOPE believe that the industry and consumer base will only continue to grow, impacting positive action on a regulatory front.

However, we realise that the space is ever shifting and the brands that are strategically equipped to react and manage regulatory hurdles will be the ones that rise to the top. With our multi-state, multi-channel approach, DOPE is that brand.

Over 70% of Americans believe that THC should be Federally legal.

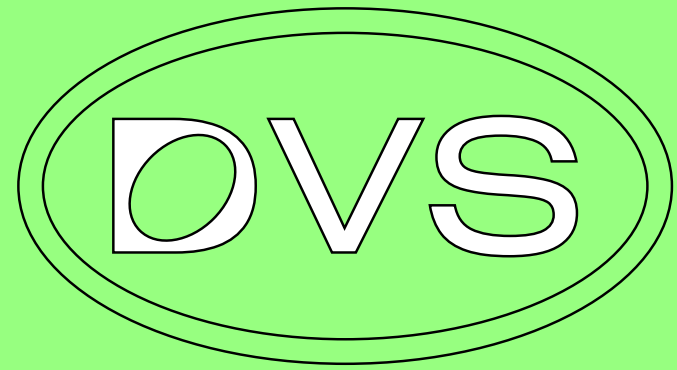

Versatile strategies for any outcome.

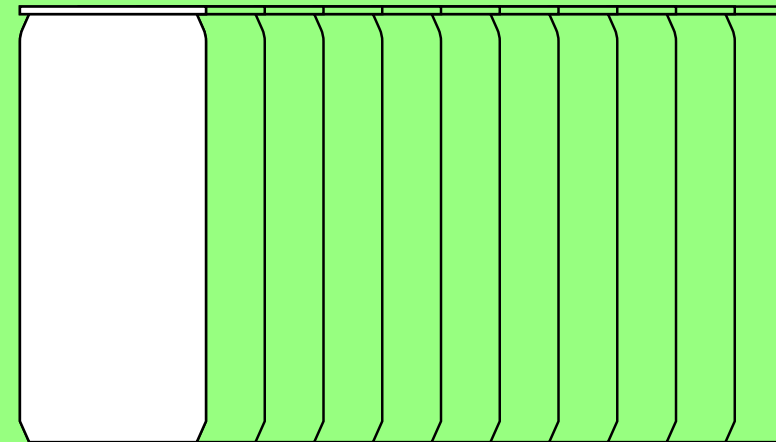

THC infused beverages set to exceed \$5 Billion in sales by 2028.
